

SOP-QA-014: Receipt of goods at the warehouse

Purpose. This procedure says how goods from suppliers are received, counted and quarantined until quality assurance releases them.

Scope. It applies to every delivery of active ingredients, excipients and packaging material at the Vadodara warehouse.

Procedure

1. Check the delivery challan and the purchase order number before unloading.
2. Count every case and compare the batch numbers with the certificate of analysis.
3. Record the temperature of cold-chain goods; anything above 8 °C is rejected.
4. Move accepted goods to quarantine with a yellow label until QA releases them.

Role	Responsibility	Record
Warehouse officer	Counts and labels goods	Goods receipt note
QA officer	Releases or rejects the batch	Release certificate

Retention. Goods receipt notes are kept for five years after the expiry of the batch.
